

1. About Aries Srl

Packaging has been around as long as there has been man, who has always needed to protect and transport his goods.

The world of packaging is constantly evolving: new needs, new opportunities, and above all, new problems present themselves before anyone who wants to operate in a sector in which technology and research play an increasingly prominent role. To meet these new needs, a different structure was born, built according to exclusive standards, set on research and continuous technological development.

Its name is Aries, since 1979, a company of new conception, created to offer customers tailor-made services, set to meet market challenges according to an alternative logic that does not simply provide standard answers but ad hoc solutions, created to solve the problems of each individual customer. Aries, therefore, is not just a packaging company, but aims to become a partner for anyone who thinks that packaging is not simply a wrapping, but the first step to achieving more success in the market.

By carefully monitoring the continuous evolution of the market, its primary goal is the TOTAL SATISFACTION OF CUSTOMERS and their needs.

- Quality and courtesy
- Promptness in examining customer needs to provide new solutions
- Sampling with minimum quantities
- Quick deliveries
- Dislocated platforms for client management logistics
