## ***Modern Agriculture Sector***

1.High-yield Demonstration Base of 10,000 mu Millet in Gaoxigou Area .....	1
2.High Standard Organic Millet Planting Base.....	2
3.Construction Project of Dali County Astragalus Complanatus Modern Agriculture Industrial Park .....	3
4.Persimmon Series Products Deep Processing Project in Fuping County .....	4
5.Construction Project of Kiwi Fruit Processing Base .....	5
6.Construction Project of Brand “ZhenAiYuan” Qin Ay Tsao Industrial Park of Yancun Town ...	6
7.Soft Seed Pomegranate Brand Building and Its Deep Processing Project in Tongguan County .....	7
8.300,000 t/y Organic Fertilizer Production Project.....	8
9.Series Agricultural and Sideline Products Deep Processing Project.....	9
10.DL-Apple Acid Production Project.....	10
11.Construction Project of Organic Agricultural Products Base.....	11
12.Kiwi Fruit Extraction and Deep Processing Project .....	12
13.High Quality Goat Whey Powder and Cheese Processing Project of Longxian County .....	13
14.Albumin Project Extracting from Tobacco Leaf.....	14
15.Linyou County Traditional Chinese Medicine Reserve Warehouse Project.....	15

## ***Infrastructure Sector***

16.Construction Project of Modern Service Center of Baoji Port Zone .....	16
17.South Shaanxi Outdoor Sports and Quality Development Center .....	17
18.Dafuyu Reservoir of Huayin City.....	18
19.Huayin City Wenggao Tourism Highway Road.....	19
20.Weinan International Modern Logistics Port Project.....	20

21.Small Basin Treatment Construction Project.....	21
22.The Project of Deepening the Comprehensive Reform of Agricultural Water Price in Chengcheng County and Promoting the Modern Irrigation Area Pilot .....	22
23.Construction Project of Dali County Chengdong New District Commercial Pedestrian Street .....	23
24.Construction Project of High Quality Grape Planting Base in Danfeng County .....	24
25.Jintai Shifang Street Project of Zhen'an County .....	25

## ***Equipment Manufacturing Sector***

26.Intelligent Manufacturing MES System and Industrial Robots Project.....	26
27.Construction Project of Baishui County Fruit Machinery Research Development and Production Base .....	27
28.International Port Zone of Xi'an National Processing & Trade Industrial Park .....	28
29.Xi'an Zhongke Aowei Photon Industrial Park Project .....	29
30.Shaanxi Laide Gas Intelligent Manufacturing Industrial Park Project .....	30
31.Civil Aircraft Production Supporting Park Project .....	31
32.Car Supporting Industrial Park Project .....	32
33.Construction Project of Intelligent Equipment Manufacturing Industry Demonstration Park .....	33
34.Business Car Parts Manufacturing Construction Project.....	34
35.Construction Project of New Energy Intelligent Car Production Base.....	35
36.Construction Project of Unmanned Aerial Vehicle and High-end Parts Industrial Base .....	36
37.Floor-type Charging Pile Research and Development and Intelligent Manufacturing Project .....	37
38.Crawler Tractors Production Project.....	38
39.Car Parts Industrial Park Project.....	39
40.Precision Machinery and Car Parts Production Project.....	40
41.Manufacturing Project of TD Supercharging Equipment in Baota District.....	41
42.Industrialization Project of Protective Equipment of Intelligent Emergency Rescue and Its Application System .....	42

43.Wind Turbine Assembly Base and Wind Blade Production Project .....	43
44.Fuping County Aviation Industrial Base Project .....	44
45.Construction Project of New-type Adsorption Material Industrial Park.....	45
46.Tongguan Car Disassembly Project.....	46

### ***High-Tech Industry Sector***

47.Xi'an Aviation Digital Intelligence Science and Technology Industrial Park .....	47
48.Qinchuangyuan IC Accelerators (Core Area of Xi'an Electronics Valley).....	48
49.Satellite Navigation and Location Service Industrial Project of Xi'an Aerospace Base .....	49
50.Construction Project of Hanyin County Electronic Information Industrial Park.....	50
51.Electronic Information Industrial Project .....	51
52.Electronic Information Industrial Project of Nanzheng District.....	52
53.Production Project of Intelligent Audio-visual Equipment in Electromechanical Industrial Zone .....	53
54.Danjiang Water Town Holiday Park Project of Shangzhou District .....	54
55.Shanyang County Energy Storage Material Research and Development Project.....	55
56.30000 Tons of PET Light Core Structure Material Project.....	56
57.Pucheng Telaijing C3099 Production Base Project .....	57
58.Construction Project of Gray-Hair Industry Research Institute.....	58
59.Molybdenum Chemical Products Deep Processing Project of Tongguan County.....	59

### ***Light Industry, Food & Medicine Sector***

60.Yuanyuan Traditional Chinese Medicine Health Research Industrial Park Project.....	60
61.Traditional Chinese Medicine Product for Health Care and Medical Apparatus Production Project .....	61
62.Fine and Deep Processing Project of Buckwheat .....	62
63.Flos Sophorae Series Drinks and Dried fresh Dehydrated Production Project in Yongshou County .....	63
64.Fine Selection Project of Coarse Cereals.....	64

65.Baoji Characteristic Food Industrial Park in Panlong High-Tech Industries Development Zone .....	65
66.Probiotic Bacteria Production and Processing Base Project .....	66
67.Anti-tumor Drug Production Base Project.....	67
68.Tongchuan Yikangchuanggu Science and Technology Industrial Park Project .....	68
69.Biological Medicine Sci-Tech Industrial Park Project of Tongchuan High-Tech Industries Development Zone .....	69
70.Top-grade Silk Garments Processing Project .....	70
71.Rich- Selenium Beer Production Project .....	71
72.Rich- Selenium Konjak Industrial Development Construction Project .....	72
73.Rich- Selenium Tea Beverage Deep Processing Project.....	73
74.Organic Traditional Chinese Medicine Deep Processing, Warehousing and Logistics Center Project .....	74
75.Health Care Food (Gastrodia Tuber and Ginkgo)Deep Processing Project.....	75
76.Gastrodia Elata Comprehensive Development Project of Lveyang County .....	76
77.Raw Material Black Chicken Essence Production Project of Lveyang County .....	77
78.Traditional Chinese Medicine Extracts and Its Series Products Processing Project.....	78
79.Boil-free Granule of Traditional Chinese Medicine Processing Project of Shanyang County .....	79
80.Zhashui Agaric Extracts Health Functional Products Project .....	80
81.2000 tons/Year Apple Pectinase Project of Luochuan County .....	81
82.Liquid Goat Milk Production Line Construction Project .....	82
83.Kiwi Fruit Fine and Deep Processing Project.....	83
84.The Project of Shaanxi-Cuisine Prefabricated Vegetable Sci-Tech Industrial Park.....	84
85.The Prefabricated Vegetable Industrial Park Project of Qianxihe Dali Central Kitchen .....	85
86.Astragalus Complanatus Beverage Technology Research Development and Industrialization Project of Dali County.....	86

### ***Energy-saving and Environmental Protection Sector***

87.Downstream Fine Chemical Products Development Project of Methanol .....	87
--	----

88.Non-ferrous Metal Recycling Project .....	88
89.Clean Energy Development and Using Project of Zhenping County .....	89
90.Li-ion Battery Headquarters Base of the High-Tech Industries Development Zone .....	90
91.Manufacturing Project of Lithium-ion Battery Material for New Energy Vehicles in Huangling County .....	91
92.The First Stage of Rural Wastewater Treatment Project of Weinan High-Tech Industries Development Zone .....	92
93.5000KW Distributed Photovoltaics Power Generation Project in Anli Town, Chengcheng County .....	93
94.Construction Project of Wastewater Treatment Plant with Daily Capacity of 60,000 Tons in Weinan High-Tech Industries Development Zone .....	94
95.Corn Stalk Comprehensive Utilization Project.....	95
96.Supply Chain Cooperation Project of Photovoltaic Industrial Chain .....	96

### ***Business Trade & Logistics Sector***

97.Zhenyuan Jinshang Times Square Project .....	97
98.Two-Chain Integrated Digital Industrial Park.....	98
99.Xi'an Caotang Aolei Project .....	99
100.Konka Silk Road Technology City Project .....	100
101.Silk Road E-commerce Center of One Belt One Road .....	101
102.China Minmetals Finance and Trade Center.....	102
103.Liuwan Car Parts Town Construction Project.....	103
104.Yintai District Image Large Commercial Complex Project.....	104
105.Jinyaotai Logistics Warehousing Center.....	105
106.Construction Project of Hengyue Business Complex of Hengkou Demonstration Zone, Ankang .....	106
107.Shantytown Reconstruction Project of Shaanxi Hanzhong Automobile Transportation Group Co., Ltd., Hantai District, Hanzhong City .....	107
108.Chengdong Smart Warehouse Cold Chain Logistics .....	108
109.South Hub International Logistics Park Project.....	109

110.Construction Project of Wuqi County Cold Chain Warehousing and Logistics Park .....	110
111.Fugu County Huiyimin Urban-Rural Cold Chain Logistics Park Project.....	111
112.Green Food Processing, Clean Vegetables Preparation and Cold Chain Distribution Center Project .....	112
113.“One Belt One Road” Import and Export Goods Distribution Center Project.....	113
114.Construction Project of Agricultural Products Cold Chain Logistics Base of Linwei District .....	114
115.Construction Project of Zhaizhuo Fruit Warehousing, Sorting and Exchange Center.....	115
116.Weizhuang Town Jici Village Sunshine Rose Grape Cold Storage Construction Project....	116
117.Construction Project of Warehousing and Logistics Center of Shaanxi Zhengchi Business Trade Co., Ltd. ....	117
118.Storage and Logistics Distribution Center Construction Project in the High-tech Development Park .....	118

### ***Cultural Tourism Sector***

119.Bailu Linyu Project.....	119
120.Xi'an Culture CBD Central Landscape Block .....	120
121.Historical and Cultural Block of Chang'an City in Han Dynasty .....	121
122.Chengzhuang Reservoir Tourism Project .....	122
123.Shilang Lake Scenic Spot Upgrading and Reconstruction Project .....	123
124.Shiquan County Homestay Cluster Project .....	124
125."Yandian Ancient Streets" Historical and Cultural Block Construction Project.....	125
126.Jiulong Valley and Zhongba Island Tourism Development at Leigutai, Ziyang County ....	126
127.Construction Project of Nangong Mountain 5A Scenic Area of Lan'gao County .....	127
128.Lan'gao County Candle Mountain Scenic Area Development Project.....	128
129.Hongshi River Ecological Tourism Resource Development Project .....	129
130.Protection and Using Project of Ancient Street of Ming and Qing Dynasties in Hengkou Demonstration Zone.....	130
131.Shayan River Ecological Tourism Holiday Park .....	131
132.Integration Project of Ecological Tourism and Accommodation in Hanjiang Valley .....	132

133.Hanshan Scenic Area Tourism Comprehensive Development Project .....	133
134.Liziping Tourism Comprehensive Development Project.....	134
135.Jade Pool Forest Health Care Center of Liping Scenic Area .....	135
136.Camping Base and Minshuku Clusters Construction Project .....	136
137.Han Cultural Characteristic Tourism Project.....	137
138.The Protection, Development and Operation of Qingmuchuan Cultural Tourism Town....	138
139.Zhashui County Longtan Forestry Health Project .....	139
140.Zhashui Yunmeng Mount Tea Tourist Resort Project .....	140
141.Shi Guangyin Sand Cultural Tourism Comprehensive Development Project in Dingbian County .....	141
142.Fuping County Jingshanyuan Strange Trees Theme Culture Industrial Park Project .....	142
143.Grass Weaving Art Gallery Project of Linwei District .....	143
144.Lingshui Street (Snack Street) Project of Taohuayuan Scenic Area of Weinan City .....	144
145.Chengcheng County Whole Region Intelligent Tourism Project.....	145

**I. Project Name*****High-yield Demonstration Base of 10,000 mu Millet in Gaoxigou Area*****II. Project Description**

Mizhi millet, a grain abundant in the Loess Plateau of northern Shaanxi, is famous for its excellent quality throughout the country, and the county is named after this. According to the "Mizhi County Annals" records: "fertile soil is suitable for millet, with rice juice like grease, hence the name of Mizhi." On September 13, 2021, the General Secretary came to Gaoxigou Village, standing in the millet field and saying: "Now, we rarely eat flour and pork, and sometimes eating cereals is good for health. " With Gaoxigou as the center, the project promotes the surrounding villages, promotes the land circulation of the whole mountain and ditch, builds a high-yield demonstration base of ten thousand mu of continuous fields of millet, and creates the green ecological brand of "Gaoxigou Organic Millet" in strict accordance with the planting and production standards of green organic millet."

**III. Total Investment and Way of Cooperation**

Total investment of the project is RMB 20 million Yuan. Way of cooperation: sole investment or joint venture.

**IV. Anticipation of Market and Analysis of Investment Return**

Through estimation, it is estimated that annual income will be RMB 5 million Yuan after it is completed and put into operation. The investment recovery period is 4 years.

**V. Project Implementation Agency**

Mizhi County Investment Promotion Center

**VI. Contact Information**

**Contact Person:** Jiang Juan

**Telephone:** 0912-6213518, 15353488015

**Fax:** 0912-6215899

**Postal Code:** 718199

**I. Project Name*****High Standard Organic Millet Planting Base*****II. Project Description**

Mizhi is a typical hilly and gully region on the Loess Plateau and is suitable for planting grains. With the brand advantages of “Mizhi millet” and “Mizhi minor cereals”, we build a grain production and planting standard system and build a large-scale high-standard organic millet planting base.

**III. Total Investment and Way of Cooperation**

Total investment of the project is RMB 50 million Yuan. Way of cooperation: sole investment or joint venture.

**IV. Anticipation of Market and Analysis of Investment Return**

Through estimation, it is estimated that annual income will be RMB 10 million Yuan after it is completed and put into operation. The investment recovery period is about 5 years.

**V. Project Implementation Agency**

Mizhi County Investment Promotion Center

**VI. Contact Information**

**Contact Person:** Jiang Juan

**Telephone:** 0912-6213518, 15353488015

**Fax:** 0912-6215899

**Address:** No. 25, Xixia Lane, Mizhi County Government, Shaanxi Province

**Postal Code:** 718199

**I. Project Name*****Construction Project of Dali County Astragalus Complanatus  
Modern Agriculture Industrial Park*****II. Project Description**

In Zhaodu Town the project is planned to build 5000 mu of Astragalus Complanatus Demonstration Planting Base, 8000m<sup>2</sup> of astragalus complanatus processing area, purchase 25 sets of production line equipment.

**III. Total Investment and Way of Cooperation**

Total investment of the project is RMB 60 million Yuan. Way of cooperation: project financing or cooperation.

**IV. Anticipation of Market and Analysis of Investment Return**

The project is centralized to develop astragalus complanatus planting base of 30,000 mu, which can produce 3000 tons of astragalus complanatus, increase 380 job positions, promote 700 farmers to engage in characteristic agricultural products planting.

**V. Project Implementation Agency**

Shaanxi Shayuanhong Agriculture Development Co., Ltd.

**VI. Contact Information**

**Contact Person:** Chen Yalin

**Telephone:** 18240834444

**Address:** Shaanxi Shayuanhong Agriculture Development Co., Ltd.

**I. Project Name*****Persimmon Series Products Deep Processing Project in Fuping County*****II. Project Description**

Introducing international advanced production equipment, the project will realize full-automatic peeling, drying of artificial intelligence and aseptic cleaning process. The project is planned to build the research and development and production bases for persimmon cake, persimmon vinegar, tannic acid extracting from persimmon peel, feed additive, dry fruit and vegetables products and Persimmon wine.

**III. Total Investment and Way of Cooperation**

Total investment of the project is RMB 1.5 billion Yuan. Way of cooperation: sole investment or cooperation between government departments and enterprises.

**IV. Anticipation of Market and Analysis of Investment Return**

It may promote the employment of local people indirectly, further improve the popularity of “Persimmon Hometown of China”.

**V. Project Implementation Agency**

Fuping County Development and Reform Bureau

**VI. Contact Information**

**Contact Person:** Zhang Yongchun

**Telephone:** 18991682880

**I. Project Name*****Construction Project of Kiwi Fruit Processing Base*****II. Project Description**

The project is planned to build the kiwi fruit industry development cluster integrating sorting, washing, production, processing and sales. The products main include fruit wine, fruit beverage and etc. The project, with the total covered area of 180,000m<sup>2</sup>, is mainly to build rooms for sorting, washing, processing, finished products and raw material, supporting facilities.

**III. Total Investment and Way of Cooperation**

Total investment of the project is RMB 200 million Yuan. Way of cooperation: sole investment or cooperation.

**IV. Anticipation of Market and Analysis of Investment Return**

After the project is completed, it will make up the development of the follow-up industries of kiwi fruit in Dongyuan Area. It has positive functions for the sales of regional agricultural products and the development and sales of food industry in this region.

**V. Project Implementation Agency**

Linwei District Industry Development Investment Co., Ltd.

**VI. Contact Information**

**Contact Person:** Guan Huani

**Telephone:** 0913-3038213

**I. Project Name*****Construction Project of Brand “ZhenAiYuan” Qin Ay Tsao Industrial Park of Yancun Town*****II. Project Description**

The project is located at Beiyan Village of Yancun Town. At present over 50 mu of high quality Qin Ay Tsao has been planted. Now it is planned to expand the planting area of 3000 mu, newly build 2000m<sup>2</sup> of Ay Tsao deep processing production workshop, warehouse of 1500m<sup>2</sup> for drying Ay Tsao, production road of 500 meters of the park.

**III. Total Investment and Way of Cooperation**

Total investment of the project is RMB 15 million Yuan. Way of cooperation: joint development.

**IV. Anticipation of Market and Analysis of Investment Return**

After the project is completed and put into production, it can produce and process 5000 tons of Ay Tsao, annual production value will be RMB 30 million Yuan, annual sales value is estimated to be RMB 50 million Yuan. The comprehensive benefit per mu is about RMB 5000 Yuan. It may effectively play economic interactive role, turn over the surrounding land, promote the mass in surrounding area to develop Ay Tsao industry. Then, it is to purchase Ay Tsao planted by the mass in surrounding area, thus the employment positions may be created.

**V. Project Implementation Agency**

Baicaowang Ay Tsao Planting Farmer Cooperatives of Weinan City

**VI. Contact Information**

**Contact Person:** Song Chengbin

**Telephone:** 18391093162

**I. Project Name****Soft Seed Pomegranate Brand Building and Its Deep Processing Project in Tongguan County****II. Project Description**

In 2020, the area of pomegranate planted in Tongguan County reached 36,400 mu. In the high-yield period of a large area, the yield per mu reached 3,000 jin, the output value per mu was 30,000-50,000 Yuan, and the annual output value of soft-seed pomegranate in the whole county reached more than 1.5 billion Yuan; the regional public brand of "Tongguan soft-seed pomegranate" is applied to the State Administration for Industry and Commerce for building a regional public brand base of soft-seed pomegranate integrating production, storage, processing, sightseeing, leisure and tourism; the Tongguan Soft-seed Pomegranate Association is established; and Tongguan soft-seed pomegranate experimental station is built. It is planned to build a deep processing project mainly for producing and processing soft-seed pomegranate juice, jam and cold-stored fruits.

**III. Total Investment and Way of Cooperation**

Total investment of the project is RMB 100 million Yuan. Way of cooperation: joint venture or sole investment.

**IV. Anticipation of Market and Analysis of Investment Return**

At present, soft seed pomegranate industry of Tongguan County has taken shape and it has broad market prospect.

**V. Project Implementation Agency**

Bureau of Agriculture and Rural Affairs of Tongguan County

**VI. Contact Information**

**Contact Person:** Wang Libo

**Telephone:** 13909138007

**E-mail:** 244071616@qq.com

**I. Project Name*****300,000 t/y Organic Fertilizer Production Project*****II. Project Description**

The project can produce 50,000 tons of water soluble fertilizer and 250,000 tons of biological organic fertilizer a year and it can process 350,000 tons of livestock manure and 150,000 tons of stalk. It is planned to build 3 soluble fertilizer processing workshops, 3 organic fertilizer fermentation workshops, 3 fermentation ponds, 3 raw and auxiliary materials warehouses, 3 finished products warehouse. It is planned to purchase 147 sets of equipment and build platform balance rooms, power distribution rooms, fire control rooms and septic-tanks and etc.

**III. Total Investment and Way of Cooperation**

The total investment is planned to be RMB 150 million Yuan. The project will be built by two stages. In the first stage the investment is RMB 90 million Yuan; it is planned to build the production lines with annual output of 100,000 tons biological fertilizer, 30000 tons of water soluble fertilizer, in the second stage, the planned task will be completed.

**IV. Anticipation of Market and Analysis of Investment Return**

After the project is completed, it may produce 250,000 tons of biological fertilizer, 50,000 tons of water soluble fertilizer a year; it is conducive to fertilizing and improving human environment.

**V. Project Implementation Agency**

The People's Government of Zhuangtou Town

**VI. Contact Information**

**Contact Person:** Zhang Juan

**Telephone:** 13636857356

**I. Project Name*****Series Agricultural and Sideline Products Deep Processing Project*****II. Project Description**

The project is planned to build the series products production lines with annual output of 1000 tons of pear, 1000 tons of persimmon, build a temperature change puffing (not fried) food production line with annual output of 1000 tons.

**III. Total Investment and Way of Cooperation**

Total investment of the project is RMB 120 million Yuan. Way of cooperation: sole investment, joint venture or cooperation.

**IV. Anticipation of Market and Analysis of Investment Return**

After the project is completed and meets its production target, annual profit after tax will be RMB 53 million Yuan.

**V. Project Implementation Agency**

Bureau of Agriculture and Rural Affairs of Binzhou City

**VI. Contact Information**

**Contact Person:** Xu Chunrong

**Telephone:** 13759866768

**I. Project Name*****DL-Apple Acid Production Project*****II. Project Description**

The project is planned to mainly build comprehensive buildings, production workshops, raw and auxiliary materials warehouses, power distribution room, pump room, janitor's room; meanwhile, it is planned to build road, harden the ground, green space and outdoor supporting project.

**III. Total Investment and Way of Cooperation**

Total investment of the project is RMB 100 million Yuan. Way of cooperation: joint venture or cooperation.

**IV. Anticipation of Market and Analysis of Investment Return**

After the project is completed and put into production, it will increase job positions for over 80 persons.

**V. Project Implementation Agency**

Changwu County Investment Promotion Bureau

**VI. Contact Information**

**Contact Person:** Han Xin

**Telephone:** 029-34204505

**I. Project Name*****Construction Project of Organic Agricultural Products Base*****II. Project Description**

The project is planned to build an organic coarse cereals base of 20,000 mu and an organic wheat base of 100,000 mu. It is to make organic certification and build brands for series agricultural products (black wheat, black corn, black soybean and black millet) and livestock and poultry meat.

**III. Total Investment and Way of Cooperation**

Total investment of the project is RMB 100 million Yuan. Way of cooperation: sole investment or cooperation.

**IV. Anticipation of Market and Analysis of Investment Return**

In normal year the total profit will be RMB 22 million Yuan and the investment recovery period will be about 5-7 years.

**V. Project Implementation Agency**

Yongshou County Investment Promotion Bureau

**VI. Contact Information**

**Contact Person:** Yang Jiangli

**Telephone:** 13892935285

**I. Project Name*****Kiwi Fruit Extraction and Deep Processing Project*****II. Project Description**

Having a covered area of 192 mu in Meixian County Kiwi Fruit Park, it is to research and develop food deep processing products with kiwi fruit as main. The project is planned to build standard production workshops and production lines involving juice, jam, preserved fruit, extract powder, prefabricated food, fast frozen warehousing and etc, meanwhile, it is planned to build supporting facilities involving office, dormitory, research and development and product promotion.

**III. Total Investment and Way of Cooperation**

Total investment of the project is RMB 800 million Yuan. Way of cooperation: sole investment or joint venture.

**IV. Anticipation of Market and Analysis of Investment Return**

After the project is completed, it is estimated that annual sales income of RMB 500 million Yuan and net profit of RMB 150 million Yuan will be realized. The investment recovery period will be about 5 years.

**V. Project Implementation Agency**

Meixian County Investment Promotion Bureau

**VI. Contact Information**

**Contact Person:** Du Yi

**Telephone:** 13289192050

**I. Project Name*****High Quality Goat Whey Powder and Cheese Processing Project of Longxian County*****II. Project Description**

The project plans to adopt the internationally advanced D90 desalination process to desalinate the sweet whey into desalted whey; after pasteurization, fresh whey without any preservative is processed through physical separation technology (electrodialysis, ion exchange), desalting, low-temperature concentration and spray drying to produce the desalted whey powder with ash content lower than 1.2%. 100% goat milk can be made of 90% whey fluid and 10% cheese.

**III. Total Investment and Way of Cooperation**

Total investment of the project is RMB 500 million Yuan. Way of cooperation: sole investment.

**IV. Anticipation of Market and Analysis of Investment Return**

With the wide popularity of whey protein in the world, the national support for national dairy industry is strengthened, and the two-child policy has enhanced the demand for milk powder, the market demand for goat milk is strong and in short supply. At present, the goat milk consumption spree have appeared in European and American countries, Hong Kong, Macao, Taiwan, Beijing, Shanghai and Guangzhou. The domestic goat milk market supply gap is up to 70%, with huge business opportunities.

**V. Project Implementation Agency**

Bureau of Animal Industry of Longxian County

**VI. Contact Information**

**Contact Person:** Wang Enli

**Telephone:** 0917-4601609

**I. Project Name*****Albumin Project Extracting from Tobacco Leaf*****II. Project Description**

New 2-5 tobacco leaf extraction production lines are built. The products are mainly extracted from tobacco leaves and are rich in albumin essential for human body, the nutrient substances of tannin, alkaloid, saponin and protease in 35% cellulose unique in tobacco are processed in steps, and the purified protein is applied for nutrition supplement of the human body. The patent technology "continuous counter-current microwave technology" is adopted, and the products are: nicotine, medical-grade nicotine, solanesol, coenzyme Q10, water-soluble F-1-P crystal protein, superoxide dismutase, detoxified vegetable protein feed additive, carbon fiber, etc.

**III. Total Investment and Way of Cooperation**

Total investment of the project is RMB 200 million Yuan. Way of cooperation: sole investment or cooperation.

**IV. Anticipation of Market and Analysis of Investment Return**

At present, the demand for protein at home and abroad is increasing, and the sales price that can be found recently is 20% higher than that of ten years ago. Longxian County has been planting flue-cured tobacco since the early 1980s, with an area of 60,000mu and a total yield of 52.92 million kg. It is the second largest county of flue-cured tobacco in the province, with sufficient raw materials, good market prospect and high return rate.

**V. Project Implementation Agency**

Bureau of Agriculture and Rural Affairs of Longxian County

**VI. Contact Information**

**Telephone:** 0917-4601682

**I. Project Name*****Linyou County Traditional Chinese Medicine Reserve Warehouse Project*****II. Project Description**

The project has a covered area of 200mu, total construction area of 12200m<sup>2</sup>, including 80,000m<sup>2</sup> of traditional Chinese medicine reserve warehouse, 10,000m<sup>2</sup> of data center, 10000m<sup>2</sup> of research development center, 10000m<sup>2</sup> of logistics center, 5000m<sup>2</sup> of extracting center, 5000m<sup>2</sup> of herbal medicine experiencing and exchange center, 2000m<sup>2</sup> of room for office and auxiliary facilities. The project is planned to purchase transport equipment and other related facilities, building supporting facilities such as road, green space, parking lot, water supply and drainage, power supply and distribution.

**III. Total Investment and Way of Cooperation**

Total investment of the project is RMB 80 million Yuan. The capital is obtained through investment promotion.

**IV. Anticipation of Market and Analysis of Investment Return**

After the project is completed, annual income will reach RMB 20 million Yuan.

**V. Project Implementation Agency**

Linyou County Health Bureau

**VI. Contact Information**

**Telephone:** 0917-7962039      0917-7961905

**I. Project Name*****Construction Project of Modern Service Center of Baoji Port Zone*****II. Project Description**

The project is located at the industry and city integration area of Port New City. Having a covered area of 200 mu, the project is planned to build the parking lot, business house, hardening ground, green space, supermarket and other infrastructure.

**III. Total Investment and Way of Cooperation**

Total investment of the project is RMB 750 million Yuan. Way of cooperation: sole investment, joint venture or cooperation.

**IV. Anticipation of Market and Analysis of Investment Return**

Along with the eastward movement of the main urban area of Baoji City, the gathering of business and logistics industry in the port area, and the sharp increase of population have highlighted a series of problems of housing security and life service quality. It is particularly important to alleviate the problems, drive the convergence of information flow of people and logistics, promote economic development, improve the living standard and happiness of residents, and promote the construction of modern service center.

**I. Project Name*****South Shaanxi Outdoor Sports and Quality Development Center*****II. Project Description**

The project is located on the east side of Longgang Homeland, Liangshan Town, Nanzheng District, covering an area of 127 mu. It mainly includes the Team Building Base, the Home Party House, outdoor rock-climbing sports center and service reception center, the Han culture automobile and catering base, the sports-theme square, the ecological parking space, the bicycle fitness loop, the main roadways in the park and the cultural exhibition landscape.

**III. Total Investment and Way of Cooperation**

Total investment of the project is RMB 550 million Yuan. Way of cooperation: stock right cooperation or joint development.

**IV. Anticipation of Market and Analysis of Investment Return**

The project is planned to construct the target buildings such as Team Building Base, Home Party House, Rock-climbing and other outdoor sports centers. After completion, the area above the ground is about 63,000m<sup>2</sup>, and the underground area is 35,000m<sup>2</sup>. The total investment is about RMB 550 million Yuan. In the later period, it can be recovered by means of selling and leasing and contracting, with a period of 2-5 years.

**I. Project Name*****Dafuyu Reservoir of Huayin City*****II. Project Description**

The dam site of Dafuyu Reservoir is located in Xiangzi Village, about 18km above Dafuyu port. The basin area of reservoir dam site control is 94km<sup>2</sup>, accounting for 46% of the whole basin. The average gradient of the river course is 29%. The basin is fan-shaped, and above the dam site, there are rocky mountain areas with overlapping peaks and hills, good vegetation and clear water flow.

The reservoir is a roller compacted concrete gravity dam, belonging to a medium-sized reservoir. The reservoir complex is composed of water retaining, water release and diversion structures. The dam height is 80m, the total dam crest length is 149m, the total capacity is 11.83 million m<sup>3</sup>, and the utilizable capacity is 10.13 million m<sup>3</sup>. The project grade is Grade III. The main structures of the complex and the dam and flood discharge structures are Grade 3, the secondary buildings are Grade 4, and the temporary structures are Grade 5. The main structures such as reservoir dam are designed according to the standard of flood with a return period of 50 years and checked according to the standard of flood with return period of 1000 years. The basic seismic intensity in the project area is VIII.

**III. Total Investment and Way of Cooperation**

Total investment of the project is RMB 800 million Yuan. Way of cooperation: cooperation.

**IV. Anticipation of Market and Analysis of Investment Return**

The reservoir is mainly used for domestic and industrial water supply, flood control and irrigation; The water supply objects of the reservoir are domestic water of Luofu Town, industrial water of Huaneng Shaanxi Qinling Power Plant and irrigation water of Luofu Irrigation District. After completion, the reservoir can meet the domestic water demand of 60,300 people in Luofu Town, with an average annual water supply of 8.28 million m<sup>3</sup>; The irrigation area is 11,000 mu, and the annual average water supply is 2.7 million m<sup>3</sup>, which improves the flood control capacity of the lower reaches of Luopu River from once in 20 years to once in 50 years.

**I. Project Name*****Huayin City Wenggao Tourism Highway Road*****II. Project Description**

Huayin Wenggao Tourism Highway Project starts from the north of Gaojia Village (115m to the east of G310 service area) and connects with the completed G310. The route is from north to south, passes through Zhengxi High-speed Railway at K1+602, then continues to go cross Wengyu River in the south at K2+359, and then runs along the east side of Wengyu River, after passing through Lianhuo Expressway at K4+793, it continues to route along the east side of Wengyu River to the old G310, and runs along the old road to the destination Lingshang Village, west connects the junction between G310 and Huashan Xifeng Cableway. The total length of the route is about 6.381km. The whole line of the project adopts the technical standard of first-class highway, the speed is designed as 60Km/h, the subgrade width is 20m, the two-way four-lane, asphalt concrete pavement is designed with Class I highway load. This project is one of the key projects determined and implemented by the Municipal Party Committee and the Municipal Government, and also an important north-south longitudinal skeleton highway determined in the "14<sup>th</sup> Five-Year Plan" of highway construction of Huayin, and has been listed in the "14th Five-Year Plan" of road network project library of Weinan City. The project is located 5km to the west of the central urban area, is the main connecting line between the new and old 310 national highways, and also the west ring line for urban development planning. The construction of the project will connect the tourist road of Huashan Scenic Spot and that of Weihe River at the south bank, and further promote the integration of southern mountains and northern rivers, and improve the tourism economic development of our city.

**III. Total Investment and Way of Cooperation**

Total investment is estimated to be RMB 210 million Yuan. Way of cooperation: government investment.

**IV. Anticipation of Market and Analysis of Investment Return**

The project enjoys priority on development around the investment project.

**V. Project Implementation Agency**

Bureau of Transport of Huayin City

**VI. Contact Information**

**Contact Person:** Liu Jianghong

**Telephone:** 18992312010

**I. Project Name*****Weinan International Modern Logistics Port Project*****II. Project Description**

Weinan International Modern Logistics Port Project is an important part of the “1+2+4” freight layout in Xi’an Railway Hub Planning (2016-2030) approved by China Railway Corporation and Shaanxi Provincial Government, is a key cooperative promotion project in the Cooperation Framework Agreement on Key Projects of Xi’an-Weinan Integration signed by Xi’an Government and Weinan Municipal Government, and is the core project of “One Park and Three Ports” logistics system in Weinan’s “14th Five-Year Plan” of logistics. The project is located on the west side of Guanzhong Ring Road and the southeast side of Datang Weinan Thermal Power Plant. It is estimated that the total investment is 16.56 billion Yuan and the total land area is about 4,000mu. The construction content is mainly divided into two parts: special railway line and logistics port.

**III. Total Investment and Way of Cooperation**

Total investment of the project is RMB 16.56 billion Yuan. Way of cooperation: investment promotion.

**IV. Anticipation of Market and Analysis of Investment Return**

Freight capacity of 5 million tons/year in near future and 6.55 million tons/year in far future will be formed. After the project is completed, it is estimated that annual income of RMB 130 million Yuan will be realized, creating job positions for over 500 persons.

**V. Project Implementation Agency**

**I. Project Name*****Small Basin Treatment Construction Project*****II. Project Description**

The Neima River basin, Changning River basin and Kongzou River basin in Fengyuan Town will be controlled; the silt dam, drainage tunnel, economic forest belt and supporting road infrastructure will be constructed.

**III. Total Investment and Way of Cooperation**

Total investment of the project is RMB 500 million Yuan. Way of cooperation: government investment or local investment.

**IV. Anticipation of Market and Analysis of Investment Return**

After the project is completed, it will effectively promote the urbanization process of local area, shorten urban-rural gap and help rural revitalization.

**V. Project Implementation Agency**

The People's Government of Fengyuan Town

**VI. Contact Information**

**Contact Person:** Quan Weihao

**Telephone:** 0913-6933314

**I. Project Name*****The Project of Deepening the Comprehensive Reform of Agricultural Water Price in Chengcheng County and Promoting the Modern Irrigation Area Pilot*****II. Project Description**

The project is to build 90,000 mu of high-standard farmland and reconstruct the irrigation area of 160,000mu.

**III. Total Investment and Way of Cooperation**

The total investment is estimated to be RMB 540 million Yuan. The funds source: firstly, specific grant of RMB 100 million Yuan for high standard farmland construction; secondly, specific grant of RMB 43 million Yuan for modern reconstruction; thirdly, specific grant of RMB 270 million Yuan for high standard farmland performance indices exchange; fourthly, RMB 130 million of society financing.

**IV. Anticipation of Market and Analysis of Investment Return**

The project is planned to adopt governmental concession operation, which is invested, constructed and operated with social capital (by Dayu Water Saving Group) for 30 years. By improving the quality of cultivated land, combining high-efficiency water-saving irrigation, water-fertilizer integration and intelligent facilities, it is expected that water, fertilizer, time and labor can be saved, and production and income will be increased. It is estimated that the production cost in the project area can be reduced by more than 20%, the crop output can be increased by more than 20%, the agricultural output value of the project area will be effectively improved, and the cost reduction and income increase is expected to reach more than 500 Yuan per mu.

**I. Project Name*****Construction Project of Dali County Chengdong New District Commercial Pedestrian Street*****II. Project Description**

Located in the north of the east extension section (middle) of Luobin Avenue, the project covers an area of 41 mu, and it is to build in the form of courtyard enclosure. The whole commercial pedestrian street will be constructed through the connection of street scale and large space square conversion. The single building is constructed by combining flat roof with sloping roof to create the commercial pedestrian street.

**III. Total Investment and Way of Cooperation**

Total investment of the project is RMB 350 million Yuan. Way of cooperation: project finance or cooperation.

**IV. Anticipation of Market and Analysis of Investment Return**

After completion of the project, it will increase the interest, activity and appreciation of the culture block in the whole east area. It can respond internally to the lack of resources in the new area, improve the structure of the new area, and externally respond to the relationship between the whole urban area and the urban texture. While continuing the history of streets and alleys and respecting the places, it is to build commercial pedestrian streets based on the urban culture to perfect the culture block in the east of the city.

**I. Project Name*****Construction Project of High Quality Grape Planting Base in Danfeng County*****II. Project Description**

Grape Wine Making Process of Danfeng County is the intangible cultural heritage of Shaanxi Province and it has a long history of one hundred years. At present, the whole county forms the industry layout of “Two Plant, Three Villa and 10,000 Mu Base”. The grape processing capacity will reach 25000 tons, wine reserve capacity 50,000 tons. The planting area of high quality brewing wine is less than 2000 mu and it can brewing wine less than 3000 tons. The large amount of raw material needs to be purchased outside the province. Therefore, it is necessary to build high quality grape wine brewing base.

**III. Total Investment and Way of Cooperation**

Total investment of the project is RMB 180 million Yuan. It is planned to build 2 grape landmark demonstration bases of 1000 mu, build 5 brewing wine core production bases of 500 mu, 2 high standard fruit gardens of 500 mu, complete related supporting facilities. Way of cooperation: joint venture, sole investment or other ways.

**IV. Anticipation of Market and Analysis of Investment Return**

Two years after the project is completed, the grape garden enters fruiting period . It can produce 3000 Jin of grape, annual yield 16.5 million tons of 5500 mu. According to the expected price of RMB 10 Yuan/Kg, annual sales income will be RMB 160 million Yuan, annual profit RMB 50 million Yuan. It will promote income increase of the persons working in the fruit garden.

**I. Project Name*****Intelligent Manufacturing MES System and Industrial Robots Project*****II. Project Description**

The project, having a covered area of 50 mu and the construction area of 32000m<sup>2</sup>, is to purchase CNC machine tools, vertical machining centers. It can produce 2000 sets of intelligent temperature flow control cabinets, 200 unmanned industrial robots, 20 unmanned multi-position grinding machines, 20 sets of MES control system platform. Yulin High-Tech Industries Development Zone, Yuyang High-Tech Industries Development Zone and Yujia Economic Technologies Development Zone have better conditions for the implementation of the project.

**III. Total Investment and Way of Cooperation**

Total investment of the project is RMB 180 million Yuan. Way of cooperation: sole investment or joint venture.

**IV. Anticipation of Market and Analysis of Investment Return**

After the project is completed, it is estimated that annual business income of RMB 146 million Yuan and total profit of RMB 36.7347 million Yuan will be realized. It is estimated that the investment will be recovered within 4.9 years.

**I. Project Name*****International Port Zone of Xi'an National Processing & Trade Industrial Park*****II. Project Description**

The total planning area of the area is 16km<sup>2</sup>, east to Xihan Road, west to Oya Avenue, south to Gangwu South Road, north to Bageng Road, fully covering China-Europe train (Xi'an) assembly center industry undertaking area. The park takes intelligent display, smart home appliances, consumer electronics, network terminal equipment and core devices, semiconductors, high-performance medical devices, etc. as the leading industries.

**III. Total Investment and Way of Cooperation**

The total investment for the project is about 30 billion Yuan. We sincerely invite leading R&D and production enterprises at home and abroad engaged in smart home appliances, digital audio-visual, network and communication equipment, consumer electronics, core devices, semiconductors and other fields to negotiate and cooperate by means of workshop leasing and land transfer.

**IV. Anticipation of Market and Analysis of Investment Return**

After the project is completed, it will gather over 100 enterprises undertaking the processing and trading industry transfer in China's South-East coastal areas. The annual production value within 3-5 years will reach RMB 50 billion Yuan, promoting 30000 persons' employment. The economic and social benefits is obviously.

**I. Project Name*****Xi'an Zhongke Aowei Photon Industrial Park Project*****II. Project Description**

The project is planned to mainly build 7 workshops and 1 comprehensive supporting house, which is expected to be put into operation in 2023. The project is mainly to build a complete laser chip manufacturing plant and micro-processing plant, integrating the R&D, production and office of photonic devices, and supporting services such as commerce, training, talent introduction, industrial fund, and incubation of small and medium-sized technological enterprises, focusing on the introduction of high-tech enterprises in the optoelectronic integration field.

**III. Total Investment and Way of Cooperation**

Total investment is about RMB 668 million Yuan, of which, the investment for basic works is RMB 168 million Yuan and RMB 500 million is for research and development and production. The marketing, enterprise operation or other ways of cooperation is acceptable.

**IV. Anticipation of Market and Analysis of Investment Return**

After this project meets its production target, it will realize production value of RMB 2.8 billion Yuan, annual profit and tax of RMB 200 million Yuan. It will create 8500 employment positions directly and indirectly. This project is planned to mainly build 7 workshops, one supporting comprehensive building. It is estimated that it will be put into production in 2023.

**I. Project Name*****Civil Aircraft Production Supporting Park Project*****II. Project Description**

Civil Aircraft Production Supporting Park has a covered area of 1164mu. The main construction contents: workshops for airplane assembly, warehouses for parts and finished products, workshops for airplane overhaul, the complete airplane painting, research and development, parking apron, stage guaranteeing area, buildings for flight test and delivery, spare parts center, supporting area of upstream and downstream civil aircraft.

**III. Total Investment and Way of Cooperation**

Total investment of the project is RMB 1.5 billion Yuan. Way of cooperation: joint venture or sole investment.

**IV. Anticipation of Market and Analysis of Investment Return**

The project is planned to improve aircraft supporting industrial chain, extend industrial chain, form industry gathering, building the most excellent civil aviation industrial platform. After the project is completed, annual production value will be about RMB one billion Yuan, annual tax contribution of about RMB 80 million Yuan. It will create 200 job positions.

**I. Project Name*****Industrialization Project of Protective Equipment of Intelligent Emergency Rescue and Its Application System*****II. Project Description**

The project is planned to be built in Hengshan District Industrial Park (South District), covering a planned area of 13 mu and a building area of 9,500m<sup>2</sup>. It mainly includes the construction of production workshop, testing center, public works and relevant auxiliary facilities, purchasing of laser cutting machine, numerical control processing center, high-speed automatic trimming computer-sewing machine, intelligent cutting bed, automatic pillow-type packaging machine, pull tester, high-strength impact resistance tester of helmet and mask, vertical flame-retardant performance tester and other related equipment; the annual production of protective equipment of intelligent emergency rescue and its application system reaches 20100 units (sets)

**III. Total Investment and Way of Cooperation**

Total investment of the project is RMB 620 million Yuan. Way of cooperation: sole investment or joint venture.

**IV. Anticipation of Market and Analysis of Investment Return**

After the project is completed, it is estimated that annual business income will be RMB 960 million Yuan, annual total profit will be RMB 150.167 million Yuan and the whole investment will be recovered within 5.5 years.

**V. Project Implementation Agency**

Hengshan District Investment Promotion Center

**VI. Contact Information**

**Contact Person:** Zhu Xupeng

**Contact Person:** Li Yupeng

**Telephone:** 18609185321

**I. Project Name*****Fuping County Aviation Industrial Base Project*****II. Project Description**

The project is planned to cover an area of about 2000 mu, around MA700 complete machine production base of AVIC XAC Commercial Aircraft Co., Ltd., focusing on the national defense and military industry, colleges and universities, scientific research institutions to provide civil aircraft manufacturing, supporting and maintenance services. It is planned to build civil aircraft industry university research base, airport flight function area, flight operation service area, production supporting area, living supporting area and financial and commercial service area.

**III. Total Investment and Way of Cooperation**

Total investment of the project is RMB 10 billion Yuan. Cooperation form: sole investment or cooperation.

**IV. Anticipation of Market and Analysis of Investment Return**

After the project is completed, it can promote 1000 persons' employment. It is planned to build a large sized airplane design, research development, flight-test and production base.

**V. Project Implementation Agency**

Fuping County Development and Reform Bureau

**VI. Contact Information**

**Contact Person:** Zhang Yongchun

**I. Project Name*****Construction Project of New-type Adsorption Material Industrial Park*****II. Project Description**

Lanshen functional material products and system application technology are widely used in many fields such as new energy, environmental protection, pharmaceutical, food, metallurgy, etc. to meet various needs of customers in different fields. Construction content: 10 production workshops, 8 warehouses, 1 comprehensive building, 2 central buildings for public works, 1 storage tank area and other supporting facilities.

**III. Total Investment and Way of Cooperation**

Total investment of the project is RMB 695.0013 million Yuan.

**IV. Anticipation of Market and Analysis of Investment Return**

From the perspective of social benefits, the implementation of the project not only promotes the development of the enterprise itself, but also drives the economic development of the upstream and downstream enterprise chains. It can create considerable tax revenue for the local government and provide some employment opportunities for the local people, and the raw materials required for the project production mainly come from all regions of Shaanxi, which is conducive to the economic development of Pucheng County.

From the angle of economic benefit, after the project is completed, annual average sales income will be RMB 1636.0343 million Yuan, annual average profit and tax (annual profit+ annual tax and additives + annual value-added tax) RMB 679.3764 million Yuan.

**I. Project Name****Tongguan Car Disassembly Project****II. Project Description**

The project, located at the county industrial park, is based on car disassembly, focuses on the development of industrial chain cyclic economy

**III. Total Investment and Way of Cooperation**

Total investment of the project is RMB one billion Yuan. Way of cooperation: joint venture or sole investment.

**IV. Anticipation of Market and Analysis of Investment Return**

The project adopts car disassembly to develop cyclic economy and new-type Kinetic energy industry. The project has broad market prospect and quick benefits.

**V. Project Implementation Agency**

Tongguan County Industrial Park

**VI. Contact Information**

**Contact Person:** Wang Tao

**Telephone:** 18992381313

**I. Project Name*****Xi'an Aviation Digital Intelligence Science and Technology Industrial Park*****II. Project Description**

The construction contents of the project includes intelligent aviation technology research and development center (air emergency rescue center), intelligent general aircraft research and development center, aviation research center, unmanned aerial vehicle research and development center, pilot training base, aviation scientific research base, etc.

**III. Total Investment and Way of Cooperation**

Total investment of the project is RMB 1.17 billion Yuan. Way of cooperation: joint venture or cooperation.

**IV. Anticipation of Market and Analysis of Investment Return**

Compatibility of the project and the society is good. It may improve the infrastructure of the whole park, strengthen the attraction of the park and actively build an economic development platform. Through calculation, the benefit rate of this project is 7.71% and the investment recovery period is 14.71 years (including construction period).

**I. Project Name*****Qinchuangyuan IC Accelerators (Core Area of Xi'an Electronics Valley)*****II. Project Description**

Qinchuangyuan IC Accelerators (Core Area of Xi'an Electronics Valley) connects Xitai Road and the comprehensive bonded area of Xi'an High-Tech industries Development Zone from the east to the west, neighbors Jiaohe Park in the south and faces Chang'an Center from One Road. It is the core area of photoelectron industrial cluster of hard technological area in Silk Road Scientific Town. The project has a total investment of RMB 8.8 billion Yuan and it has a covered area of 417.84 mu and total construction area of 1.1029 million m<sup>2</sup>. There are 43 buildings with various functions.

**III. Total Investment and Way of Cooperation**

Total investment of the project is RMB 8.8 billion Yuan.

**IV. Anticipation of Market and Analysis of Investment Return**

The investment orientation is planned to be semiconductors, artificial intelligence, industrial internet and 5G.

**I. Project Name*****Satellite Navigation and Location Service Industrial Project of Xi'an Aerospace Base*****II. Project Description**

Centering on the industrial chain links such as load research and development, core chip, basic software, terminal, electronic map, operation platform and application service, it creates office, research and development, production and test conditions and relevant supporting facilities, and builds a satellite navigation and location service industrial cluster covering the links of product research and development, production and manufacturing, system integration and operation service.

**III. Total Investment and Way of Cooperation**

The total investment is more than 300 million Yuan, and the source of funds is self-raised by the enterprise. The cooperation mode of the project takes enterprises as the main body, and can adopt various cooperation modes for investment, construction and operation as required. The space base provides good industrial environment and supporting services.

**IV. Anticipation of Market and Analysis of Investment Return**

Annual production value will be RMB 300 million Yuan.

**I. Project Name*****Electronic Information Industrial Project of Nanzheng District*****II. Project Description**

The project covers an area of 300mu with a total construction area of 210,000m<sup>2</sup>. It is planned to build “one base and three areas”, i.e. electronic manufacturing valley production base, R&D office area, storage and logistics area and basic supporting area. According to different products, the production base of electronic manufacturing valley can be divided into three production areas: electronic component processing area, information display production area and intelligent terminal production area.

**III. Total Investment and Way of Cooperation**

Total investment of the project is RMB 1.24 billion Yuan. Way of cooperation: sole investment or joint venture.

**IV. Anticipation of Market and Analysis of Investment Return**

After the Electronics Intelligent Manufacturing Valley is completed and put into production, it will provide jobs for about 2800 persons, it will promote the economic development of surrounding rural areas, which provide places and space for the transfer of surplus labor forces in this area.

**V. Project Implementation Agency**

**I. Project Name*****Danjiang Water Town Holiday Park Project of Shangzhou District*****II. Project Description**

The project is located in Yecun Town, Shangzhou District, on the north bank of the beautiful Danjiang River, only 30km away from the urban area of Shangzhou, adjacent to Shangdan First-class Highway, and 15km from the exit of Shanghai-Shaanxi Expressway at Shahezi. The project is planned to cover an area of 480mu. Danjiang Water Town Resort is one of the core projects of Lianhua Mountain Ecological Scenic Spot. With the goal of building the largest water theme leisure park in southern Shaanxi, it will build a water park, a water residence yard, a health care hotel, boutique catering and resort supporting facilities, forming a core attraction area for the Happy Water World. After the completion of the project, it will connect with Mangling Greenway - National 4A Scenic Spot in the north and Dihua Ancient Town in the east, with remarkable tourism driving effect.

**III. Total Investment and Way of Cooperation**

Total investment of the project is RMB 1.2 billion Yuan. Way of cooperation: government guidance, society participation or investment promotion.

**IV. Anticipation of Market and Analysis of Investment Return**

After the project is completed, it is estimated that annual tourist reception capacity is 400,000 and annual comprehensive income is RMB 450 million Yuan.

**I. Project Name*****30000 Tons of PET Light Core Structure Material Project*****II. Project Description**

The project, having a covered area of 50 mu, is planned to build 30,000 tons of PET light quality core structure material. It is planned to build PET foaming workshops, heat sealing workshops, composites workshops, molding workshops, granulation workshops, drying workshops, packaging workshops, raw material warehousing workshops, finished products warehouse and supporting facilities.

**III. Total Investment and Way of Cooperation**

Total investment of the project is RMB 530 million Yuan. Way of cooperation: sole investment or joint venture.

**IV. Anticipation of Market and Analysis of Investment Return**

After the project is completed, the product profit a ton is RMB 6620 Yuan, the profit rate is 38.9%. The production value of core PET material a year exceeds RMB 500 million Yuan; including the additional value growth, the profit is increasing and it will form obvious advantages and competitiveness.

**I. Project Name*****Pucheng Telaijing C3099 Production Base Project*****II. Project Description**

In order to meet the growing market demand and promote the development of high purity quartz sand industry in northwest region, based on the enterprise development plan, Pucheng Telaijing Technology Co., Ltd. puts forward the building plan of C3099 production base project with annual output of 50,000 tons of high purity quartz sand. The project has a total covered area of 62.77 mu and total construction area of about 83888.52m<sup>2</sup>.

**III. Total Investment and Way of Cooperation**

Total investment of the project is RMB 505 million Yuan. The project capital will be financed by the construction unit.

**IV. Anticipation of Market and Analysis of Investment Return**

After the project is completed, it will produce 50,000 tons of high purity quartz sand and the annual sales income will reach RMB 2 billion Yuan. The static investment recovery period (including the construction period) after tax is 6.21 years and the internal rate of return is 16.80%. The project has stronger risk resistance capacity.

**I. Project Name*****Construction Project of Gray-Hair Industry Research Institute*****II. Project Description**

Located in the Innovation and Entrepreneurship Base, the project reaches Hongjing Street in the north, ends at Kangning Road in the west, Dingsheng Street in the south and Kangfu Road in the east. It covers a total area of 43mu and a total construction area of 57,000 square meters, the land is for scientific research. The main construction contents include: gray-hair industry scientific research building, gray-hair industry incubation plant, gray-hair industry training building and auxiliary supporting service building. The construction period is 18 months. The construction standard: plot ratio  $\leq 2.0$ , building density  $\leq 30\%$ , and green space ratio  $\geq 30\%$ .

**III. Total Investment and Way of Cooperation**

Total investment of the project is RMB 200 million Yuan. Way of cooperation: sole investment or cooperation.

**IV. Anticipation of Market and Analysis of Investment Return**

After the completion of the project, the specific action strategy and implementation plan of the gray-hair industry are proposed from the aspects of gray-hair service industry, gray-hair real estate industry, gray-hair supplies industry, large leisure and great health, etc. based on the analysis and research on the current economic development situation of Grey-Hairs at home and abroad.

**I. Project Name*****Molybdenum Chemical Products Deep Processing Project of Tongguan County*****II. Project Description**

Including ammonium molybdate, molybdenum disulfide and sodium molybdate. The deep processing production lines involving molybdenum oxide, ammonium molybdate, metal molybdenum powder, molybdenum wire and molybdenum plate etc. The molybdenum product has high additional value. The main clients include home China Petroleum, China Petroleum and Chemical Corporation, Oversea Shell Petroleum, Exxon Mobil Corporation. Usage: it is used in manufacturing alkaloids, printing ink, fertilizer, molybdate red and precipitant, catalyzer and molybdenum salt of sun resistant pigment. It also is used in manufacturing fire resistant agent, pollution-free cold water system of metal Inhibitor; it also can be used in inhibitor, polishing agent and chemical reagent.

**III. Total Investment and Way of Cooperation**

Total investment of the project is RMB 300 million Yuan. Way of cooperation: joint venture or sole investment.

**IV. Anticipation of Market and Analysis of Investment Return**

Molybdenum is widely used in metallurgy, energy source, chemical industry, national defense, aviation and other fields. It has become one of indispensable raw materials. Therefore, molybdenum becomes more and more important in industrial development.

**I. Project Name*****Yuanyuan Traditional Chinese Medicine Health  
Research Industrial Park Project*****II. Project Description**

The project is located in the area east of Zhongyuan Auto Parts City, west of Xihan Highway, north of Xiyu Expressway and south of Gangxing Third Road, with a planned land area of about 45mu and a total building area of about 80,000m<sup>2</sup>. It is mainly to build the head office building of Yuanyuan Group, scientific research building, modern traditional Chinese medicine extraction workshop and preparation workshop, intelligent storage center, production-learning-research platform and industrial alliance community.

**III. Total Investment and Way of Cooperation**

The total investment of the project is about 800 million Yuan. The International Port Area Management Committee and Yuanyuan Health Industrial Park adopt the cooperation method of land transfer, introducing Yuanyuan Group's innovative product R&D, production, manufacturing, and the advanced chain management mode facing the national market and the sales mode of products directly to the final consumer.

**IV. Anticipation of Market and Analysis of Investment Return**

Yuanyuan Health Industrial Park is planned to build a large health science and technology park integrating production, research and marketing. According to Yuanyuan Group's solid production and research technology, market development ability, extensive consumer groups and large number of members, it is estimated that the annual output value of the project is RMB 500 million Yuan after reaching the production capacity, which can drive the employment of 1,000 persons in the port area.

**I. Project Name*****Probiotic Bacteria Production and Processing Base Project*****II. Project Description**

The project, having a planned area of 100 mu, focuses on the construction of a probiotic bacteria research development center, a sterile workshops, finished products package workshop, meanwhile, build the production bases involving raw materials of probiotic bacteria, fine preparation of probiotic bacteria.

**III. Total Investment and Way of Cooperation**

Total investment of the project is RMB one billion Yuan. Way of cooperation: sole investment or joint venture.

**IV. Anticipation of Market and Analysis of Investment Return**

Probiotics can promote the ecological balance of microbial flora in the intestinal tract of the host, improve the intestinal flora structure, promote the proliferation of beneficial bacteria in the intestinal tract and inhibit the growth of harmful bacteria, thereby improving the specific or nonspecific immunity of the organism. At present, the probiotic market in China is in a period of rapid growth, and the market scale of the probiotic industry will be further expanded. After the completion of the project, it is expected that the annual output value will reach 800 million Yuan, the profit and tax will reach 40 million Yuan, and 100 persons will be employed.

**I. Project Name*****Anti-tumor Drug Production Base Project*****II. Project Description**

The project has a covered area of 80 mu and the construction area of 100,000m<sup>2</sup>. It is mainly to build GMP anti-tumor special workshop. It is planned to build dust-free, sterile and constant-temperature workshops according to the standard of 100,000m<sup>2</sup> of cleaning workshops. The production equipment is procured according to EU Standard, involving automatic packaging, tableting and installation. It owns advanced equipment of three-dimensional motion mixers, high speed tablet press and capsule filling machines.

**III. Total Investment and Way of Cooperation**

Total investment of the project is RMB one billion Yuan. Way of cooperation: sole investment or joint venture.

**IV. Anticipation of Market and Analysis of Investment Return**

Anti-tumor drug has always been the largest field of the global medicine market and it has been keeping the quickest growth speed. In our country, cancer is the second largest death disease, accounting for 22.32% of death toll. With the aging development, the incidence rate and death rate caused by tumor has been increasing. The demand on anti-tumor medicine is strong and the industrial space is broad. After the project is completed, it is estimated that annual business income will reach RMB one billion Yuan and tax contribution RMB 60 million Yuan.

**I. Project Name*****Tongchuan Yikangchuanggu Science and Technology Industrial Park Project*****II. Project Description**

Tongchuan Yikangchuanggu Science and Technology Park Project is located in the southwest of Zhaojin Road and Jingsi Road, New Material Industrial Park in Tongchuan New Area. It is developed and implemented by Tongchuan Industrial Park Investment and Operation Co., Ltd., a wholly-owned subsidiary of Tongchuan Development and Investment Co., Ltd. (state-owned capital investment and operation company), with a total area of 86713 m<sup>2</sup>. It is planned to build 15 standard workshops and 1 comprehensive building.

**III. Total Investment and Way of Cooperation**

Total investment of the project is RMB 350 million Yuan. Way of cooperation: sole investment, joint venture or cooperation.

**IV. Anticipation of Market and Analysis of Investment Return**

The water, electricity and gas prices of the enterprises in the park are charged according to the market price, and the underground sewage and solid waste treatment station is designed. At present, the project adopts the mode of rent-sale investment promotion, and the settled enterprises enjoy various preferential policies of investment promotion from the municipal government.

**I. Project Name*****Organic Traditional Chinese Medicine Deep Processing, Warehousing and Logistics Center Project*****II. Project Description**

Yangxian County has more than 200,000mu herbals of Chinese medicinal materials including Magnolia officinalis, Cornus officinalis, Eucommia ulmoides, pawpaw, rhizoma corydalis, radix bupleuri, salvia miltiorrhiza, etc. The planting of Magnolia officinalis, Cornus officinalis, honeysuckle, etc. has been certified for national organic product base. The annual output of Chinese medicinal materials is more than 20,000 tons. The project is planned to cover an area of 250mu, and build the production line of Chinese medicinal materials decoction pieces, the production line of traditional Chinese medicine extraction and preparation, the production line of health care products, with the annual output of 18000t deep processing series of organic Chinese medicinal materials; it will also construct modern logistics storage center, with a construction period of 2 years.

**III. Total Investment and Way of Cooperation**

Total investment of the project is RMB 500 million Yuan. Way of cooperation: sole investment or joint venture.

**IV. Anticipation of Market and Analysis of Investment Return**

After the project is completed, it is estimated that annual sales income will be RMB 400 million Yuan. The cost will be recovered within 5-7 years and it will provide job for over 200 persons.

**I. Project Name*****Boil-free Granule of Traditional Chinese Medicine Processing Project of Shanyang County*****II. Project Description**

The project adopts modern high-tech means to extract and concentrate all the medicinal ingredients of a single traditional Chinese medicine into instant granules, the formula granules replace the decoction pieces, with granules instead of decoction, which has the advantages of convenience, rapidness, safety and sanitation, and maintains the advantages of low toxicity, small reaction, easy absorption, quick effect, high curative effect and the like of the traditional Chinese medicines. According to the requirements of “National Pharmacopoeia”, it is planned to build a production line of traditional Chinese medicine boil-free granules in the provincial high-tech zone of Shanyang County. The production line adopts modern production technology for extraction and concentration, with aluminum-plastic packaging, and the annual output of traditional Chinese medicine boil-free granules is 2,000 tons.

**III. Total Investment and Way of Cooperation**

Total investment of the project is RMB 150 million Yuan. Way of cooperation: sole investment, joint venture or other.

**IV. Anticipation of Market and Analysis of Investment Return**

After the project is completed, annual sales income will be RMB 200 million Yuan, profit and tax RMB 60 million Yuan.

**I. Project Name*****Zhashui Agaric Extracts Health Functional Products Project*****II. Project Description**

8 production lines of health functional products of agaric such as agaric active polysaccharide, agaric active small peptide, agaric protein powder, agaric micronutrients, etc. are built, 20000m<sup>2</sup> of production workshops, warehouses, auxiliary rooms, etc. are built, and 4 sets of supporting production line equipment are built, with an annual output of 3,000 tons.

**III. Total Investment and Way of Cooperation**

Total investment of the project is RMB 400 million Yuan. Way of cooperation: sole investment, joint venture or cooperation.

**IV. Anticipation of Market and Analysis of Investment Return**

Tussah black fungus is rich in effective nutrients including carbohydrate, protein, fat, cellulose, iron, calcium, phosphorus, carotene and vitamins B1, B2 and C. According to the test analysis, every 100 grams of black fungus contains 375 mg calcium and 185mg iron. All quality indexes meet the requirements of national first-class standards. According to statistics, the growth rate of health food consumption in urban and rural areas in China is 15%-30%, and is increasing year by year. After the project is put into operation, it has a good prospect. The annual profit is expected to be RMB 100 million Yuan.

**I. Project Name*****Corn Stalk Comprehensive Utilization Project*****II. Project Description**

Linyou County enjoys plenty of light, heat and water resources. It has about 176000 mu of corn planting area. It will produce 300,000 tons of corn stalk, some agricultural stalk of wheat and sorghum. The project is planned to purchase stalk processing equipment. Through comprehensive utilization of agricultural stalk of corn and wheat, the project may produce degradable film, fiber pulp, degradable meal boxes and xylitol and other products.

**III. Total Investment and Way of Cooperation**

Total investment of the project is RMB 220 million Yuan and the funds will be obtained through investment promotion.

**IV. Anticipation of Market and Analysis of Investment Return**

After the project is completed, it will process 100,000 tons of corn stalk to produce degradable film of 1000 tons, 900 tons of fiber pulp, 450 million degradable meal boxes, 3000 tons of xylitol and 120,000 tons of biological organic fertilizer.

**I. Project Name*****Zhenyuan Jinshang Times Square Project*****II. Project Description**

1. Project Type: New Project

2. Project location: entrance and exit of Fanger Road Station of Metro Line 6 on both sides of Fangzheng Street between Fanger Road and Fangsan Road in Baqiao District.

3. Construction content: The west area of the project is an open commercial street, which is enclosed by a commercial complex, three high-rise commercial buildings and a lower-floor shopping mall. There are six independent commercial buildings in the east area of the project. The net land for Phase I is about 61.767mu, and the total construction area is 284,000m<sup>2</sup>. The total investment of Phase I is planned to be RMB 1.08 billion Yuan, and now RMB 968 million Yuan has been invested. Total 6 high-rise residential buildings and 3 independent commercial buildings have been built, with the residential area of 167,400m<sup>2</sup> and the commercial area of 60,000m<sup>2</sup>. At present, the project has the complete five certificates and is in the process of sale. The total construction area of Phase II of the project is 278,300m<sup>2</sup>, to be developed by cooperation.

4. Investment advantages: The project is located in the core area of the business circle of Textile City, and is seamlessly connected with Fang'er Road Station of Metro Line 6, with convenient transportation. There are dense residences and schools around it, with a large passenger flow. After completion, it will provide high-quality catering, shopping and other commercial supporting services.

**III. Total Investment and Way of Cooperation**

Total investment of the project is RMB 2.5 billion Yuan. Way of cooperation: sole investment or cooperation.

**I. Project Name*****Two-Chain Integrated Digital Industrial Park*****II. IProject Description**

The two-chain integration digital industrial park covers an area of 111 mu with a total construction area of about 308,000m<sup>2</sup>. It is composed of three parts: “Two-chain Integration Entrepreneurship Incubation Center”, “Two-chain Integration Digital Innovation Promotion Center” and “Two-chain Integration Scientific Research Acceleration Center”, covering scientific research office, single headquarters, compound office, commercial supporting facilities, etc. The overall positioning of the project is "Future Digital Science and Technology Valley, Intelligent Service Demonstration Park", and to create a "4+N" digital economy ecological system with four industries of "frontier information technology, intelligent manufacturing, intelligent medical treatment and scientific and technological service". Break the single development mode of traditional industry and take the integration of industry and city as the core and leading concept.

**III. Total Investment and Way of Cooperation**

Total investment of the project is RMB 3.168 billion Yuan. Way of cooperation: unlimited.

**IV. Anticipation of Market and Analysis of Investment Return**

The completion of the two-chain integration digital industrial park project will directly affect the facility construction in the area and optimize the regional development environment, thus realizing the promotion of economic and social benefits driven by the industrial development of the park.

**I. Project Name*****Konka Silk Road Technology City Project*****II. Project Description**

The project is located in the southeast corner of the intersection of Qinhan Avenue and Fangwei Road in Xi'an International Port Area, covering an area of 148 mu and a total construction area of about 146,000m<sup>2</sup>. Adhering to the concept of integrated development of industry and city, the project focuses on building multi-functional scientific research pilot plant, high-standard plant, customized plant, headquarters office, etc. with the goal of building a new type park of 4.0 version of ecological chain industry cluster, and provides one-stop enterprise service platform and intelligent park management platform, and develops into a comprehensive and intelligent new park integrating intelligent manufacturing, R&D and innovation, headquarters office and other functions.

**III. Total Investment and Way of Cooperation**

Relying on Konka's scientific and technological innovation platform and industrial resource advantages, the project adheres to the industrial main line of "semiconductor + new consumer electronics + new energy", and focuses on introducing headquarters economy, R&D and innovation, semiconductor industry, new consumer electronics and high-tech intelligent manufacturing enterprises. The park will develop into a comprehensive industrial cluster of headquarters economy, innovation economy and intelligent manufacturing, and a diversified enterprise platform and industrial base of "interaction, transaction and sharing". Enterprises intending to settle down may cooperate in the form of purchase operation.

**IV. Anticipation of Market and Analysis of Investment Return**

With the semiconductor R&D and manufacturing base as the core, the project will build the Internet and smart home headquarters at the same time. Relying on the leading brand effect and industrial resource advantages of Konka, more than 20 Konka ecological chain enterprises will be introduced to settle in, and an industrial park of the whole chain industrial cluster of headquarters economy, science and technology innovation research and development and intelligent manufacturing will be formed. The project leads to employment of 2,000 persons.

## **I. Project Name**

### ***Camping Base and Minshuku Clusters Construction Project***

## **II. Project Description**

The tourism market presents the characteristics of self-driving tour, parent-child tour and country tour at home which are becoming more and more popular. The completion of Provincial Highway 230 has greatly facilitated the sightseeing tourists to Huayang. With the continuous development of the 5A project in Huayang Scenic Area, more tourists will be attracted to visit. The Provincial Highway 230 runs through Qishiban, Zhifangban and Baliguan Town, and the scenery along the line is beautiful with sweet air. The tourism features such as handmade fine dried noodles at Qishiban Wulangmiao Village, Wentong home at Zhifangban, organic planting at Caoba Village and bird town at Baliguan are especially suitable for the development of camping and home stay. The project mainly aims to create high-quality camping bases and home stay cluster projects such as Wulangmiao handmade dried noodles making experience, Wentong folk custom and Wentong home stay culture village, organic planting at Zhifangban Caoba, home stay stay experience village, Baliguan Bird home stay village and the like so as to form an integrated tourism boutique project integrating food, accommodation, travel, entertainment and shopping. At present, Heixia Village of Baliguan Town (near Provincial Highway 230) has had a relatively superior scenic spot foundation, with about 20 mu of construction lands, complete infrastructures such as water, power and roads, adjacent to the scenic spot of Baliguan Bird Town, which is very suitable for the development of camping projects.

## **III. Total Investment and Way of Cooperation**

Sole investment or joint venture.

## **IV. Anticipation of Market and Analysis of Investment Return**
